

Revolutionary Emini System...
What is the main reason behind a huge impact that Emini Trading Course™ has had on the emini trading community?
■ By Zack Kolundzic
I remember my beginning trading days when information on trading was not as

readily available as it is today. Internet was in its infancy and the best source of info was a local library and a few trading magazines and papers. However it didn't take me too long to realize that Technical Analysis and TA tools if used in a way that majority of traders were using them was a sure way to lose a shirt...

Why did you come to such conclusion?

First of all I tested most of the major TA tools and the results were not promising. Every single TA tool was producing way too many entry signals. Many of the signals were occurring after the rally had al-

ready lost a steam and many of the signals were occurring at the time when the price would linger at the range for a long time. Basically what needed to be done was to use TA in a way that majority of traders were not using it. This is where the idea for Emini Trading Course™ was born...
